MEMORANDUM FOR: The Comptroller

THROUGH : Chief, Intelligence Group  
Office of the Comptroller

FROM :   
PMS/Planning Group

SUBJECT : DI Reprogramming Request

REFERENCES : A. COMPT 84-164, dated 21 Feb 1984   
B. COMPT 83-1255/2, dated 14 Dec 83, same  
subject as Ref A.

1. As a near-term action supporting the Agency's strategic plan, the Executive Director has mandated that each Directorate undertake an office automation project. We have searched for a likely candidate office that had an appropriate technological understanding, a willingness to participate, a headquarters location, and a substantive focus that was of high interest while being susceptible to radical improvement in the short run. The Life Sciences Division of OSWR has a branch studying the BW/CW problem that fits the bill well. The total cost of this office automation project is  of which can currently be funded in the appropriate SOC by ASG, who will fund and manage the project.

2. This reprogramming action requests that you approve the following transfer of funds within ASG to provide the remaining funds:

<u>FAN</u>	<u>SOC</u>	<u>Component</u>	<u>Amount</u>
471000	2534	ASG	<span style="border: 1px solid black; display: inline-block; width: 100px; height: 50px; vertical-align: middle;"></span>
471000	2543	ASG	
	3109	ASG	

Sufficient funds are available in SOC 2534 to cover the costs of this project. This reprogramming will not adversely impact the ongoing operations of ASG.
